### DECEMBER SPECIAL

Bring in your tank for hydrostatic testing by December 29 and receive a free visual and air fill. A \$40 value for \$25!

### UNDER NEW OWNERSHIP!

After 15 years, Chuck Larsen has retired. Instructor Al Pahnke and his wife Barb are the new owners of Green Bay Scuba, LLC. Please stop in to see the new location at 1316 Velp Avenue. We look forward to meeting you and making this your dive shop of choice. Stop by on Dec 19 for an Open House from 10-4. We will have extended hours and be serving refreshments and hors d'oeuvres. Please join us! We have great Christmas ideas.

### STOCKING STUFFER IDEAS

Don't forget the diver on your Christmas list. We have some great stocking stuffer ideas:

- Flashlights
- Dive Logs
- Coffee Mugs
- Mouse Pads
- Books
- Retractors
- Air Cards
- Equipment Cleaners & Maintenance Supplies
- Mask, Snorkel & Fins
- Wetsuits
- Travel Accessories
- Dive bags

Merry  
Christmas  
and  
Happy  
New  
Year!

## MAINTENANCE TIP

Proper cleaning and maintenance of your gear can extend it's life. Before you pack your dive gear away for the season, be sure you have properly cleaned and maintained your equipment. Be sure to clean your BCD to prevent damage from salt crystals, chlorine and organic residue. We offer a cleaner B.C. Life which is a complete, scientifically balanced maintenance system for all types of B.C.D.s.

Regular cleaning leaves B.C.D. shell, interior lining, hose and valves conditioned and free from damaging residue.

Cleaner is available in various sizes. Also stop by for a pamphlet on proper cleaning for all your dive gear and equipment.

## NEW ITEM

We now carry the Kapitool Reef snorkel. The world's first pressure-regulated snorkel. This revolutionary dry snorkel uniquely regulates exhalation pressure and separates fresh ready-to-inhale air from exhaled carbon dioxide. Some of the benefits that sets Kapitool Reef apart from others in the snorkeling industry:

- Regulates Exhalation Pressure
- Maintains lung volumes
- Separates inhaled air from exhaled carbon dioxide
- Stays amazingly dry
- Reduces snorkel panic
- Perfect for all experience levels and ages.

Stop by to view this item for yourself.

## MARK YOUR CALENDAR

Green Bay Scuba will be leading a dive trip to Bonaire in October 2010. Watch our website for final details. Bonaire has some of the worlds best diving. We hope you can join us!

## PUBLIC SAFETY DIVERS

Green Bay Scuba is now an authorized dealer and factory technician for Ocean Technology Systems Guardian Full Face Mask (FFM). If you would like to try diving a FFM, we have a demo for you to use in the pool during any open water pool session.

## COMING SOON

In time for the 2010 diving season, Green Bay Scuba will offer Nitrox. We will be offering classes to those interested in learning to dive with Nitrox.

We would like to hear from you. Please give us your feedback on how we can meet your diving needs.

## CONGRATULATIONS!

Congratulations go out to Calumet County who certified 19 divers for their dive team. They are comprised of volunteer fire fighters who worked hard during September and October to complete their Open Water and Advanced Open water certifications during less than ideal weather conditions. We are confident they will serve Calumet County well.

Interested in receiving our newsletter via e-mail, just drop us a note at [sales@gbscuba.com](mailto:sales@gbscuba.com). We will periodically send out specials via e-mail, so please sign up. Also, make sure you add gbscuba to your contacts. Not interested in receiving this newsletter? Simply drop us a note or call us and we will be happy to take you off our list.
